

## 4000<sup>th</sup> Patient Announcement

Today we celebrate our 4000th proton therapy graduate, Brian, who finished treatment for prostate cancer. For this major milestone, Brian shared kind words about the Center. "I did a lot of research before choosing proton therapy. We are so lucky to have this technology available here. The staff are wonderful." If you are at the Center in the next few days, have your photo taken in the balloon arch!
